

Material Fact - 05/18

Colíder HPP – Schedule Change

Companhia Paranaense de Energia – COPEL, a company that generates, transmits, distributes and sells power, with shares listed on the B3 (CPLE3, CPLE5, CPLE6), the NYSE (ELPVY, ELP) and the LATIBEX (XCOP), pursuant to the provisions of CVM Instruction No. 358/02, hereby announces to its shareholders and to the market in general, that the commercial start-up of the Colíder Hydroelectric Power Plant was revised, with the first generation unit expected to be in June 2018, while the previous information was that the start-up would be in May 2018.

On April 12, 2018, the third and last Kaplan rotor of the plant was completed. In the powerhouse, the final stage of assembly of the three groups of generators and turbines follows at an intense pace, while the transmission line that will connect the Colíder HPP to the Cláudia Substation in the 500 kV voltage is in the final phase of installation, with launch of cables in progress.

In addition, the Company informs that it does not know the origin of the divergences between the information contained in the report of the National System Operator - ONS and those disclosed by Copel regarding the perspective of commercial start-up of the plant.

Curitiba, April 25, 2018.
