Information about the participation of the counterparty, its partners or management in the Company's decision – making process about the transaction or negotiation of the transaction as representatives of the Company, describing such participation	Technical negotiations were developed between BNDES and Cutia Empreendimentos, respecting parameters and technical and financial criteria, established by the bank for the financial support in the implementation of infrastructure projects, according to the Energy Auction Announcements

Related-Party Transaction – 02/18

	<p>promoted by ANEEL.</p> <p>The conclusion of the agreement was approved at a meeting of the Company's Board of Directors, held on September 12, 2018.</p>
<p>Detailed justification of why the issuer's management considers that the transaction is conducted on an arm's length basis or envisages appropriate compensatory payment:</p>	<p>In order to optimize its projects and in line with internal policies, the Company conducts quotations and seeks the best financing conditions offered by financial institutions.</p> <p>BNDES is one of the largest development banks in the world and currently, is the Federal Government's main instrument for long-term financing and investment in all segments of the Brazilian economy.</p> <p>Being a public company and not a commercial bank, BNDES encourages innovation and development. It offers financing in infrastructure and makes available its conditions prior to the realization of the auction, independent, therefore, of the winner, which in itself already demonstrates that the transaction is conducted on an arm's length basis.</p> <p>In this way, taking into account the criteria and assumptions set forth in the aforementioned Auctions, the Company's management considers that the transaction has observed commutative conditions and provides for adequate compensatory payment, given that BNDES offered the same criteria offered to the other agents of the market to carry out the operation</p>
