HPP Colíder - second generating unit in commercial operation

Companhia Paranaense de Energia – COPEL, a company that generates, transmits, distributes and sells power, with shares listed on B3 (CPLE3, CPLE5, CPLE6), the NYSE (ELPVY, ELP) and the LATIBEX (XCOP), hereby announces to its shareholders and the market in general that the second generating unit of the Colíder Hydroelectric Power Plant (UG1), with 100 MW in installed capacity, began its commercial operations on this date, pursuant to Aneel Dispatch N. 1,273/2019, of May 6, 2019.

Together with the first generating unit (UG1) of the Colíder Hydroelectric Power Plant, in operation since March 2019, the UG2 start-up represents 200 MW of installed capacity in commercial operation (of a total of 300 MW of the venture) and 118.7 average MW in assured power (out of a total of 178.1 average MW).

As a result, the assured power of the Colíder HPP already represents almost the total of 125.0 average MW of energy sold through the Agreement of Energy Trading in the Regulated Environment (CCEAR).

Power Plant	Contract	Installed Capacity (MW)	Assured Power (Average MW)	Energy Sold in the (Average MW)	Price ¹ (R\$/MWh)	CAPEX (R\$ million)	Concession Expires
HPP Colíder 100% Copel GeT	01/2011 of 01.17.2011	300	178.1	125.0	172.08	2,364.0	01.16.2046

¹ Adjusted by the IPCA up to March/2019. Font: CCEE.

In addition, the Company reports that it has updated the construction work schedule of the last generating unit of the venture. The work remains in the stage of electromechanical assembly, with commercial start-up expected for the second half of 2019.

Curitiba, May 7, 2019.
