

Fact Sheet 2013

Corporate Profile

Copel – Companhia Paranaense de Energia – generates, transmits, distributes and trades electric energy, and also provides telecommunication services. The Company is one of the largest electric power facilities in Brazil. The Company's position in the sector is a result of 59 years of experience and technical proficiency in generating, transmitting and distributing electric power.

Copel went public in April 1994 on Bolsa de Valores de São Paulo BM&FBOVESPA - and, in July 1997, became the first company of the Brazilian electric power sector with shares traded on the New York Stock Exchange. Copel's shares are also traded in Europe, on the Latibex – the Latin American arm of the Madrid Stock Exchange, since June 2002. In May 2008 COPEL joined BM&FBOVESPA's Level 1 of Corporate Governance.

Currently, Copel directly serves 4.2 million customers units in 395 municipalities and 1,113 localities (districts, villas and villages). Copel holds 21 own power plants and has interests in other 10 generation companies, totaling 5,456 MW of installed capacity. In order to transmit and distribute the electric power generated, the Company counts on 2,174 km of transmission lines and 187,743 km of distribution lines, being the third largest network in Brazil. Copel's staff is composed by 8,647 employees.

COPEL's electricity sales to final customers, comprising Copel Distribuição's sales in the captive market and Copel GeT's sales in the free market, increased by 9.6% between January and December. This result was chiefly due to the 21.3% upturn in electricity sales to industrial customers thanks to the performance of this economic sector in Paraná State in 2013 (5.6% increase, versus the increase of 1.6% in Brazil as a whole) and Copel GeT's strategy of allocating more energy to the free market, allowing sales to industrial customers in other States.
