

## IR COPEL 13/06 - 11/30/2006

### **COPEL remains in the ISE -** the Bovespa's Corporate Sustainability Index

Copel has been retained in the Bovespa's Corporate Sustainability Index, as announced this morning at the São Paulo Stock Exchange. The new portfolio will become effective tomorrow, December 1, 2006, and will remain valid for one year.

The ISE is designed to measure the return on a portfolio composed of shares of companies that are highly committed to social responsibility and corporate sustainability, and also to promote good practices in the Brazilian corporate environment, considering such aspects as corporate governance, economic efficiency, environmental balance and social justice.

The criteria for inclusion in the index are:

- a. to be among the 150 most-traded shares, measured in the twelve months prior to the portfolio reevaluation;
- b. to have a trading session presence of at least 50%, measured in the twelve months prior to the portfolio reevaluation;
- c. to meet the sustainability criteria in the annual questionnaire.

Companies that completed the questionnaire last year were reassessed this year using the same methodological procedures and criteria. COPEL's shares were selected for the first edition of the index (2005) and were retained this year.

It is worth emphasizing that in 2006, the firms comprising the ISE outperformed the Ibovespa.

Once again, Copel has been given due recognition for its commitment to sustainable development not only by the Bovespa, but also by ABRADÉE, who granted it the 2006 Social Responsibility Award.

Curitiba, November 30, 2006

Sincerely,  
Paulo Roberto Trompczynski  
CFO and Investor Relations Officer
