

Material Fact - 04/18

Amendment and Restatement of the Financial Statements for 2016 presented for comparative purposes

Companhia Paranaense de Energia – COPEL, a company that generates, transmits, distributes and sells power, with shares listed on the B3 (CPLE3, CPLE5, CPLE6), the NYSE (ELPVY, ELP) and the LATIBEX (XCOP), pursuant to the provisions of CVM Instruction No. 358/02, hereby announces to its shareholders and to the market in general, complementing its Notices to the Market No. 26/17 and 29/17, released by the Company on November 14 and 24, 2017, respectively, that it filed today with the CVM the Management’s Report (“MR”) and the Financial Statements for the fiscal year ended December 31, 2017 (“2017 FS”), with an amendment and restatement of the financial statements for the fiscal year ended December 31, 2016 (“2016 FS”).

As already disclosed in Note No. 3.2 to the our Interim Financial Information as of September 30, 2017 (“FI 3Q17”), during the preparation of our FI 3Q17, the Company's Management identified an investment by its indirect subsidiary UEG Araucária Ltda. in a Multimarket Investment Fund, which holds shares of other investment funds that in turn invest in a private company, whose main asset is a real estate development.

In light of such finding and in compliance with the best governance practices, the Company's Management relied on independent experts that, together with the Management, conducted an internal investigation into the accounting classification and value of such investment, other impacts and the circumstances of the investment. The valuation has already been concluded, but the investigations are still going on.

After the valuation was concluded and during the investigations, we found that (i) the investment occurred strictly in the UEG Araucária, (ii) this investment violated Copel’s investment policy, which authorizes investments in wholly-owned investment funds only to the extent such funds invest exclusively in bonds issued by the Brazilian federal government or by financial institutions controlled by the Brazilian federal government, (iii) the need to establish a provision for the devaluation of such investment in 2016, due to (a) its specific characteristics, such as (b) that if the correct nature of that investment had been identified during that year, additional analyzes would have been carried out, which would make it possible to conclude that there were signs of a devaluation. As recognized in the 2016 FS previously disclosed, as of December 31, 2016, this investment amounted to R\$165.7 million and was recognized under “Bonds and Securities”, as a current asset. This accounting classification was based on the information delivered at that time by the management of UEG Araucária to the Company’s Management, pursuant to which that investment was made in a wholly-owned fund, that was composed of shares issued by other investment funds and government bonds, with immediate liquidity and that were available for sale.

Notice to the Market - IR 04/18

Based on our conclusions about the investments' accounting classification and value and based on the information available until the preparation of the 2017 FS, we recognized a provision for the impairment of such investment amounting to R\$ 136.9 million as of December 31, 2016. This provision was recorded under "Bonds and Securities" with a corresponding increase in "Financial expenses". The remaining amount of such investment in 2016, which corresponded to R\$28.8 million, was reclassified as a non-current asset in light of the expected term for realizing it.

In light of the above, the opinion of our independent auditors on our individual and consolidated financial statements for the fiscal year ended December 31, 2017 was issued with a qualification with respect to the information related to the fiscal year 2016 and presented for comparative purposes, which was amended and restated to reflect the adjustments discussed above. This qualification was inserted in the auditors' opinion due to the fact that our internal investigation has not been concluded and the auditors are not able to issue a conclusive and sufficient opinion about whether the impairment provision should be recognized in the financial statements for the fiscal year ended December 31, 2016 (included in the financial statements for the fiscal year ended December 31, 2017 for comparison purposes) or whether this provision should be recognized in earlier fiscal years.

In addition to the above, Copel Distribuição recognized adjustments to the impact of tax litigation in earlier fiscal years. As a result of such adjustments, we recognized an increase of R\$ 32.0 million in "Financial expenses" as of December 31, 2016 and a corresponding increase in the provision for litigation under our non-current liabilities, as well as an increase under "Deferred income tax and social contribution" in our Income Statement, amounting to R\$ 10.9 million, and the corresponding increase in "Deferred Taxes" in our non-current assets.

As a result of the above mentioned adjustments discussed above, the financial statements for the fiscal year ended December 31, 2016, required for comparison purposes, were amended and restated in the financial statements for the fiscal year of 2017. Please refer to our Standard Financial Statements (*Demonstrações Financeiras Padronizadas – DFP*) for detailed information (Note No. 4.1).

The following charts reflect the impact of the above mentioned adjustments discussed above in our Balance Sheet and our Income Statement for 2016.
